Wow, what a great event! Our people looked AWESOME and holy smokes, did they perform! Despite the fact that this was an evening run with high temperatures, limited visibility, skinny, winding roads and a GIGANTIC crowd of competitors, our team rocked it! Fourteen of the most motivated folks took to the streets and every single one of them **BEAT THEIR OWN GOAL that they had each set as a part of our nine week training program.**

We also had a great time with our DDSmart products, as you can see from the photos - these are from my camera, which isn't the best, and there are better ones on the way - but I think that we really did draw tons of attention to the product line. There were a few other DDSmart teams out there that night also and together the DDSmart blue wave looked awesome!

Again, thanks to Brian and the crew at Active. At the beginning I had not idea that managing this group would require so much time and effort, but it was worth it and the support from your folks was fantastic. Thanks again.

To those yet to compete....ENJOY!

Ernie
