Has anyone out there tried Newton Running shoes?

I am interested in the neutral pair, however I wouldn't mind feedback even if it is in regards to the stability trainers.

If you have tried either shoe, do you think they are worth the \$175.00 asking price???

Just curious...

I've never heard of them and can't imagine they'd be any better than a \$90 pair of asics, NB, nike, brooks, pearls etc.

Newton Running Shoes

I'd recommend googling "newton running shoes review"

Here's a link to a Runner's World forum about them.
