Thanks to IBM, Wimbledon is the first Slam to make the jump to the iPhone.

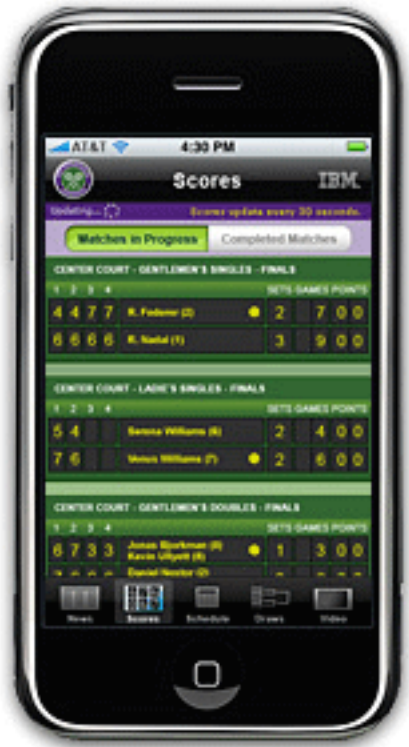

Their FREE iPhone app is now available in the app store (search Wimbledon). The app features four tabs: Latest News, Live Scores and Scoreboards, Draws and Video Highlights.

The Australian Open was leading the way for awhile with a decent mobile version of their site, offering news, live scores, results and draw updates.

Now for Wimbledon, you can download an app that offers it all in one neat package.

Now if we could just get some free television coverage...
