

Searching for Events on Active.com

I need help on searching for event in my area: When I put my state and click on the type of event (like "cycling"), I get a list of event names. Each listed event has a name that is a link to the event details. I have the option of sorting the list by "type" or "relevance". Good.

Now, when I click on an event name, a new page opens and in many cases, the event is in the past. So, I waste a lot of time opening webpages of events I can't register for. I can't imagine why such events are left on the list many of which were in 2008!

The question: How can I get a list of cycling events all of which are in the future?

Thanks for any pointers!!

When you go to search.active.com, you are defaulted to the "More" tab. To search for cycling events, you should click on the "Activities & Events" tab. From this tab you can search for cycling events in a specific area and for a specific date range. If you don't specify a date range, it will default to showing events in the future. Let me know if that helps.

We are working on a new version of our search located at <http://searchbeta.active.com>. Please take a look at that and make sure to let us know how you like it by clicking on the Leave Feedback link. Thanks!
